submissions:

closed (20 December 2023)

Message from the Guest Editors

Nowadays, more and more different chromatographic approaches with a variety of sample preparation procedures, extraction and detection techniques are used for the isolation, separation, identification and quantification of unknown and known organic compounds from a wide range of natural samples (plant samples, environmental samples such as water or soil samples, etc.). Today, chromatography is a very useful technique for the analysis of various organic molecules and, when combined with appropriate detectors, offers higher sensitivity and selectivity for trace analysis of multicomponent mixtures. For this special issue, researchers are invited to submit original work on new or improved extraction techniques and analytical methods that use chromatographic methods for the separation and determination of unknown and known organic compounds from various natural matrices, and also to discuss the potential of newly applied methods.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
