of Sevilla, 41092 Sevilla, Spain

Message from the Guest Editor

This Special Issue on "CFD Applications in Heat Transfer Research and Simulation" aims to provide the latest significant advances in the applications of computational fluid dynamics in heat transfer. Topics include, but are not limited to:

- CFD fundamentals;
- CFD applications in electronics cooling;
- CFD applications in heat exchangers;
- CFD applications in power generation, combustion, and rotating machinery;
- CFD simulations of devices and processes for heat transfer enhancement.

Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
