Electrosynthesis of Metal–Organic Framework Membranes for Energy and Sensing Applications

Guest Editors:

Dr. Avishek Banik

Department of Chemistry and
Graduate Center for Materials
Research, Missouri University of
Science and Technology, Rolla,
MO 65409-1170, USA

Dr. Rana Dalapati

Department of Material Science
and Engineering, University of
Utah, Salt Lake City, UT 84112,
USA

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

This Special Issue aims to present the latest advancements and cutting-edge research on the preparation of MOF membranes using electrochemical methods. It will serve as a platform to showcase innovative strategies, novel materials, and fundamental insights into the electrochemical synthesis and characterization of MOF membranes. The issue will encompass a comprehensive range of topics, including but not limited to electrodeposition techniques, electrochemical characterization, optimization of synthesis parameters, scalability, stability, and the integration of MOF membranes into functional devices.

The contributions to this Special Issue will provide valuable insights into the design, synthesis, and characterization of MOF membranes prepared using electrochemical methods, further advancing our understanding of their structure–property relationships and facilitating their practical applications.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
