This special issue on "The applications of Artificial Intelligence in Food Processing and Food Industries" aims to provides a collection of high-quality manuscripts related to the implementation of AI or any of its subdivisions in food processing and food industries such as, but not limited to:

- computer vision
- machine learning
- deep learning and real-world applications
- sensor technology
- big data analytics, and internet of things (IoT)
- integrating explainability into existing AI systems
- aspects of software engineering, such as intelligent programming environments, verification and validation of Al-based software, and hardware architectures enabling real-time Al approaches, safety, and reliability
- industrial experiences in the application of the above techniques, e.g., case studies or benchmarking exercises

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
