

Advances in Green Manufacturing and Optimization

Guest Editors:

Prof. Dr. Michele Dassisti

Department of Mechanics,
Mathematics & Management,
Polytechnical University of Bari,
Piazza Umberto I, 1, 70121 Bari
BA, Italy

Dr. Shixin Liu

College of Information Science
and Engineering, Northeastern
University, Shenyang 110000,
China

Deadline for manuscript
submissions:

closed (20 April 2024)

Message from the Guest Editors

This Special Issue on “Advances in Green Manufacturing and Optimization” is to report the latest advancements in green manufacturing, with a focus on the development and deployment of new analytical models, frameworks, optimization algorithms, and management strategies aiming at improving the sustainability of manufacturing. The ultimate goal of this Special Issue is to foster the dissemination of high-quality research in terms of theory and practices related to green manufacturing automation. Topics include, but are not limited to:

- Modeling and optimization of energy-aware manufacturing
- Modeling and optimization of demanufacturing and remanufacturing;
- Green process design and operation: production planning and scheduling
- Green product design
- Materials for green manufacturing
- Artificial intelligence and machine learning in green manufacturing for product quality and process control
- Life-cycle assessment: streamlined methods and case studies
- Sustainable manufacturing practices
- Smart paradigms for sustainability in manufacturing

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
