submissions:

closed (15 October 2023)

Message from the Guest Editors

Dear Colleagues,

The formation, occurrence, and flow processes of natural gas in the multiscale reservoirs are becoming new hot research topics. In addition, the fluids behaviors of oil, gas, and water in porous media and the associated complex physical, chemical, and biological processes will be particularly important for geo-energy exploration and exploitation together with the carbon capture, utilization, and storage. We therefore call for submissions to be included as part of a Special Issue covering the new advances in physical, chemical, and biological processes in energy geoscience, especially for unconventional gases and geothermal energy. Novel, original research articles and reviews are all welcomed. Potential topics include but are not limited to the following:

1. Depositional and diagenetic processes of geo-energy reservoirs.
2. Formation and evolution mechanism of pores and fractures.
3. Characterization of organic and mineralogical properties of unconventional geo-energy.
4. Fluids flow behaviors in porous media under geological conditions.
5. Exploration, development, and utilization of geo-energy resources (including oil, gas, and geothermal resources).

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
