# **Novel Methodologies for the Synthesis of Bioactive Molecules**

Guest Editors:

## Dr. Andrea Citarella

Department of Chemistry, University of Milan, Via Golgi 19, 20133 Milan, Italy

## Dr. Serena Vittorio

Department of Pharmaceutical Sciences, Università degli Studi di Milano, Via Mangiagalli 25, 20133 Milano, Italy

#### Dr. Laura Ielo

Department of Chemistry, University of Turin, Via P. Giuria 7, 10125 Turin, Italy

Deadline for manuscript submissions:

15 July 2024

## **Message from the Guest Editors**

The field of organic synthesis has witnessed significant advancements in recent years, with a particular focus on the development of novel methodologies for the synthesis of biologically relevant molecules. Contributions to this Special Issue may cover a range of topics, including:

- Green synthesis: investigations into the development of eco-friendly methodologies for the synthesis of bioactive molecules, focusing on sustainable practices and minimizing ecological footprints.
- Flow chemistry strategies: exploration of continuous flow systems for the synthesis of bioactive compounds, highlighting the advantages of improved reaction control, scalability, and safety.
- 3. Unconventional reaction conditions: research on the application of unconventional reaction conditions, such as microwave-assisted synthesis, photochemistry, and electrochemistry, to assist the production of bioactive molecules.
- 4. Catalysis and selective transformations: advancements in the use of catalysis and selective transformations to achieve higher yields, reduced by-products, and improved overall efficiency in the synthesis of bioactive compounds.

# **Message from the Editor-in-Chief**

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
