Message from the Guest Editors

This Special Issue aims to act as a platform for researchers from around the world to discuss the current problems and consequences of the generation of food and agricultural waste, as well as proposals for overcoming these problems, which include the waste valorization of value-added products and their applications, in order to reduce and prevent their adverse environmental impact. Manuscripts related to all types of food and agricultural waste generation and their utilization, including innovative waste transformation techniques (e.g., pyrolysis, gasification, and hydrothermal carbonization), biological processes (e.g., syngas fermentation and anaerobic digestion), value-added products, biofuels, biorefineries, and Life Cycle Analysis, are welcome.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
