Message from the Guest Editors

This Special Issue on “Advances in Innovative Engineering Materials and Processes (II)” aims to promote research and development activities in innovative engineering materials, process engineering, and material forming processes. We hope this Issue “Advances in Innovative Engineering Materials and Processes” will stimulate further interest in materials and processes research.

Potential topics of interest include but are not limited to the following areas:

- New advanced functional materials;
- Development of innovative post-processing and materials;
- Properties optimization techniques;
- Process design and optimization;
- Process synthesis and design;
- Process control and operations;
- Process safety management;
- Chemical and physical engineering fundamentals;
- Chemical and physical engineering equipment design and process design;
- Process systems, instrumentation, and control;
- Nanomanufacturing;
- Environmental engineering and sustainable development;
- Traditional material forming processes (including rolling, extrusion, forging, and drawing) and incremental forming, severe plastic deformation processes, and microforming;

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
