Study on Metabolic Mechanism of Chronic Diseases

Guest Editors:

Dr. Claudio Pirozzi

Department of Pharmacy,
University of Naples Federico II,
Via Domenico Montesano 49,
80131 Naples, Italy

Dr. Adriano Lama

Department of Pharmacy,
University of Naples Federico II,
Naples, Italy

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Recently, many clinical studies have been performed to develop new therapeutic strategies for the treatment of metabolic disorders, including obesity, insulin resistance, diabetes, metabolic syndrome. Metabolic alterations related to incorrect dietary habits including fat overnutrition have become common, threatening public health, markedly enhancing the onset and the progression of metabolic diseases and associated immunological and inflammatory complications. However, many researchers have mainly focused on functional studies which attempt to discover metabolic mechanisms of these chronic pathologies.

This Special Issue welcomes papers on research characterized by in vitro and in vivo approaches aimed at identifying specific molecular mechanisms in controlling metabolic diseases caused by lipid overload or high-fat diets in addition to counteracting the associated disorders involving the induction of inflammatory process and immune response.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
