Message from the Guest Editor

Dear Colleagues,

Engineered nanomaterials are increasingly being used for a wide range of applications, including industrial catalysts, medical products, cosmetics, consumer products, and food packaging. During the past two decades, substantial effort has been put into developing methods and improving analytical instrumentation for nanomaterial characterization, which has facilitated a better understanding of nanomaterial release and transformation through various stages of their life cycle.

In this Special Issue, we invite submissions exploring nanomaterial release from various products/items through various stages of their life cycle, focusing on quantification of nanomaterial release, as well as submissions discussing the regulatory relevance of nanomaterial characterization and state-of-the-art methods. Contributions can be submitted as research papers, short communications, or reviews.

Dr. Aiga Mackevica

Guest editor

Keywords: nanomaterials; nano-enabled products; characterization methods; nanomaterial release

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspecc**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
