Message from the Guest Editors

All experimental works falling within the scope of this Special Issue, including original research papers, short communications, review articles, and perspective articles, are invited for submission.

This Special Issue on the “Synthesis and Application of Novel Nanocatalysts” aims to curate novel advances in the development and application of nanocatalysts to address longstanding challenges in heterogeneous catalysts. Topics include, but are not limited to:

- Development of new nanocatalysts and applications for organic reactions;
- Developments in hybrid metal nanocatalysts for organic reactions;
- Development of heterogeneous catalysis;
- Fabrications and applications of nanocatalysts.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
