Message from the Guest Editors

It is our pleasure to invite you to submit to this Special Issue your research articles, review papers, and short communications discussing the recent developments in the field of the synthesis, modification, physicochemical characteristics (physicochemical parameter modifications, for example, are connected with solubility, stability, and crosslinking), and evaluation of adsorption properties of different materials to obtain adsorbents for applications in water and wastewater treatments and purification processes. The topics of the papers to be submitted to this Special Issue are defined, but not limited, by the keywords presented below:

- adsorbents
- adsorption
- environment
- wastewaters
- heavy metals
- dyes
- pesticides
- toxic substances
- purification
- removal

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
