Dr. Kong Fei Chai

Food Science and Technology Programme, School of Chemistry, Chemical Engineering and Biotechnology, Nanyang Technological University, Singapore 637459, Singapore

Deadline for manuscript submissions:
closed (31 August 2021)

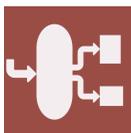

Message from the Guest Editors

Food packaging is an important parameter that can help to prolong the shelf life and reduce the wastage of food. The use of energy and resources to develop food packaging should be minimized and kept as environmentally friendly or "green" as possible. New solutions for the synthesis of food packaging materials which could be described as sustainable processes or which could have a positive environmental impact are desired. These might include the limited use or replacement of organic or harmful solvents during processing, or green processing technologies applied to the synthesis of food packaging materials. We are interested in innovations in food packaging for meat, seafood, vegetables, or any wet, dry, or fresh produce.

Topics include, but are not limited to, the following:

- Green processing technology applied to the synthesis of food packaging;
- Novel biopolymers from waste streams for use in food packaging;
- Biodegradable or edible food packaging;
- Smart, active, or intelligent food packaging;
- Microbes producing polymers for food packaging;
- Nano-technology.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
