Deadline for manuscript  
submissions:

**15 September 2024**

### Message from the Guest Editors

This Special Issue on “Metal-Based Formulations for Eco-Sustainable Processes in Homogeneous and Heterogeneous Catalysis” aims to provide a platform to highlight new research and significant advances in the development of homogeneous or heterogeneous metal-based catalysts for eco-sustainable processes. In addition, both theoretical/computational and experimental studies aimed at understanding the mechanisms of action of catalysts will be well highlighted.

Topics of research and review papers could include, but are not limited to, methods and/or applications in the following areas:

- Homogeneous catalysis;
- Heterogeneous catalysis;
- Metal-based formulation development;
- Development of computational/theoretical methodologies/approaches;
- Catalyst application in sustainability processes;
- New strategy for controlling air and water pollution;
- Redesigning the conventional synthetic route as a more sustainable approach.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**,  
**SCIE (Web of Science)**, **Ei Compendex**, **Inspecc**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
