Deadline for manuscript submissions:

closed (15 March 2021)

Message from the Guest Editor

This Special Issue on "Applications of Biosorption in Wastewater Treatment" aims to assess recent trends, new developments, and applications in biosorption. The contents of this Special Issue may cover the use and characterization of new biosorbents (dead biomass or living biomass) that demonstrate superior effectiveness to others already described or in use, including the possible use of biopolymers for this purpose. It could also cover the use of immobilized cells in real biosorption processes and biosorption in municipal wastewater treatment, with special attention to its actual application, either as a single treatment or as a combined treatment.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
