Department of Surgery (Plastic),
Yale School of Medicine, New
Haven, CT 06510, USA

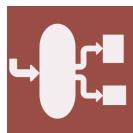

Deadline for manuscript
submissions:

closed (15 April 2021)

Message from the Guest Editor

In this Special Issue, we welcome both research and review manuscripts targeted towards disease modeling using engineering and stem cell approaches including , but not limited to, in vitro models of diseases of the heart, lung, intestine, liver, kidney, cartilage, skin, and vascular, endocrine, musculoskeletal, and nervous systems, as well as models of infectious diseases and cancer. We also encourage manuscripts on the use of human inducible pluripotent stem cells to recreate diseases in a dish.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
