Redesign Processes in the Age of the Fourth Industrial Revolution

Message from the Guest Editor

Dear Colleagues,

This Special Issue, which is supported by the journal's Editorial Board, aims to highlight new comprehensive transdisciplinary models for the design of innovative processes in a range of Science and Technology fields. This holistic approach is reshaping current research and production strategies, which are too often confined to traditional, linear thought patterns. The merging of academic and industrial experience with economic and environmental knowledge will help laboratories, industries, and businesses achieve sustainable growth. We are expecting papers with the power to disrupt and innovate, which exploit combinations of technologies to shape our future processes.

Prof. Dr. Giancarlo Cravotto
Guest Editor

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
