Deadline for manuscript
submissions:

closed (15 February 2023)

Message from the Guest Editor

The scope of this Special Issue is to offer a platform where new developments in carbonaceous materials from biomass and waste plastics will be published. The focus of these developments may relate the application of advanced processing techniques to synthesize, manipulate, and functionalize the carbonaceous materials and detailed chemical and functional characterization of the raw materials and composites; and optimization of the properties of the materials and composites for potential use in high-tech applications. I kindly invite any researcher that wants to contribute in this area to submit their work in this Special Issue on “Green production of carbonaceous materials from biomass and waste plastics”.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
