Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editors

This Special Issue on “Alternative Solvents, Biomass, and Catalysis as Pivotal Tools in Green Chemistry” aims to cover the recent advances in the field of green chemistry, focusing on the use of (a) alternative solvents (ionic liquids, deep eutectic solvents); (b) renewable biomass feedstocks (lignocellulosic, chitinous, waste residues); and (c) catalysis (heterogeneous and homogeneous), in conjunction or individually, and thereby provide interdisciplinary, comprehensive, and insightful research in the area.

We welcome all kinds of high-standard articles (research and review papers) from academia, industries, and government agencies. We do hope that this Special Issue will draw together contributors from different fields to stimulate the exchange of ideas and spread knowledge on the current capabilities and the new possibilities for a sustainable future.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Giancarlo Cravotto

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
