

Power System Expansion Planning

Guest Editors:

Prof. Dr. Matti Lehtonen

Department of Electrical
Engineering and Automation,
Aalto University, 02150 Espoo,
Finland

Dr. Amir Safdarian

Electrical Engineering
Department, Sharif University of
Technology, Tehran 1136511155,
Iran

Deadline for manuscript
submissions:

closed (31 October 2021)

Message from the Guest Editors

Energy is the prerequisite of industrial activities, a necessity for human communities, and a basic requirement for food production. As the world population grows, the demand of energy also increases. At the same time, climate change is accelerating and raw materials are being depleted. To meet the above challenges, the world is currently undergoing a radical transition towards sustainable energy. In many cases, this means electrification of energy uses in traffic, heating systems, and industrial processes. The increased demand of carbon-free electricity leads to the extensive utilization of weather-dependent variable renewable energy sources like wind and solar power. This calls for new flexibility in power and energy systems which can be achieved—in addition to energy-storage solutions—by the sector coupling of power and heat, as well as the utilization of the flexibility of power uses in industrial processes, electrified traffic, and power-to-X applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **InspeC**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
