## Wave Energy Technologies in Korea

Guest Editors:

**Dr. Keyyong Hong**

Marine Renewable Energy  
Research Division, Korea  
Research Institute of Ships and  
Ocean Engineering, Daejeon  
34103, Korea

**Dr. Bo Woo Nam**

Department of Naval  
Architecture and Ocean  
Engineering, College of  
Engineering, Seoul National  
University, Seoul 08826, Korea

Deadline for manuscript  
submissions:

**closed (30 September 2021)**

### Message from the Guest Editors

The development of wave energy technologies in Korea has shown significant progress in recent years, and prototype devices are being actively tested in Korean coastal waters. Wave energy resources are abundant around the Korean peninsula, and the blue economy—including marine renewables—has become a key strategy for the Korean energy mix, which provides great opportunities for wave energy development in Korea. I would like to invite wave energy experts to share their experience and knowledge on the innovative and advanced technologies for wave energy harvesting. In particular, I encourage Korean researchers to submit laboratory and field research achievements in wave energy systems and their hybrid technologies which have been mainly developed in Korea. However, this call is also open to global experts who have studied relevant technologies applicable and optimized for Korean coastal waters. This Special Issue will greatly promote the development of wave energy in Korea as well as the future collaboration between wave energy researchers.

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
