remote sensing

The editorial team would like to congratulate the winners of the *Remote Sensing* 2020 Outstanding Contribution Awards, who were selected based on the citation data downloaded in the Web of Science and finally approved by the EiC, Dr. Prasad S. Thenkabail. They will receive 1000 CHF and an electronic certificate.

2020 OUTSTANDING CONTRIBUTION AWARD

WINNERS

Transferring Deep Convolutional Neural Networks for the Scene Classification of High-Resolution Remote Sensing Imagery (10.3390/rs71114680)
by Fan Hu, Gui-Song Xia, Jingwen Hu and Liangpei Zhang

A Non-Stationary 1981–2012 AVHRR $NDVI_{3g}$ Time Series (10.3390/rs6086929)
by Jorge E. Pinzon and Compton J. Tucker

Their research results have received a very high frequency of citations. We believe these two papers have contributed greatly to the field of Remote Sensing. The authors are also respected in the related field.

Regulations
— In order to maximize the impact of candidate articles, we decided to hold this award every four years.
— The next edition will be held in 2024, and the candidate articles will have been published in 2016, 2017, 2018, and 2019.
