

Multisource Remote Sensing Image Interpretation and Application

Guest Editors:

Prof. Dr. Hongmin Gao

Dr. Hao Li

Dr. Xin Li

Dr. Mingxiang Yang

Prof. Dr. Pedram Ghamisi

Dr. Bin Yang

Deadline for manuscript
submissions:

closed (25 March 2024)

Message from the Guest Editors

This special issue is intended to invite papers involving multisource remote sensing image interpretation approaches and applications.

(3) Suggested themes and article types for submissions.

Review or researches articles on methodologies or applications including the advantages and limitations are welcome. This topic includes technologies and up-to-date methods which help advance science. The contributions to this collection will undergo peer review. We welcome contributions covering all aspects of multisource remote sensing interpretation and applications.

The following topics, but not limited to, are of particular interest:

- Multisource remote sensing (panchromatic, multispectral, hyperspectral, LiDAR, SAR) data fusion
- classification, pansharpening, unmixing;
- Remote sensing applications (e.g., river detection, road detection, flood detection, landslide monitoring, water sources management, land cover mapping, crop extraction);
- Computer vision methods in multisource remote sensing image interpretation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
