Deadline for manuscript  
submissions:

**closed (31 July 2022)**

### Message from the Guest Editors

This Special Issue aims to provide a platform for researchers to publish innovative work on the advanced technologies for position and navigation under GNSS signal-challenging or denied environments. Specifically, we invite contributions concerning the following topics:

1. GNSS multipath and NLOS identification, mitigation or correction;
2. Weak GNSS signal tracking and position determination;
3. GNSS interference and spoofing detection;
4. LiDAR/Visual SLAM;
5. MEMS inertial measurement unit;
6. Atomic Interferometer Gyroscope and Accelerometer;
7. Indoor position;
8. Multi-sensor integration and fusion;
9. Micro-Technology for Positioning, Navigation, and Timing.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
