## Remote Sensing of the Cryosphere II

Guest Editors:

### Prof. Dr. Ulrich Kamp

Earth and Environment  
Discipline, Department of Natural  
Sciences, University of Michigan-  
Dearborn, 4901 Evergreen Rd.,  
211 Science Faculty Center,  
Dearborn, MI 48128, USA

### Prof. Dr. Dmitry Ganyushkin

Department of Physical  
Geography and Landscape  
Design, Saint-Petersburg State  
University, 199034 St. Petersburg,  
Russia

### Dr. Bijeesh K. Veetil

Laboratory of Ecology and  
Environmental Management,  
Science and Technology  
Advanced Institute, Van Lang  
University, Ho Chi Minh City  
700000, Vietnam

Deadline for manuscript  
submissions:

**29 February 2024**

### Message from the Guest Editors

Dear Colleagues,

The first volume of the Special Issue “Remote Sensing of the Cryosphere” received positive feedback and includes 16 contributions

([https://www.mdpi.com/journal/remotesensing/special\\_issues/R](https://www.mdpi.com/journal/remotesensing/special_issues/R)). The second volume “Remote Sensing of the Cryosphere II” aims to continue this success.

The cryosphere, is sensitive to changes in global climate; hence, scientists monitor its state and changes, particularly with remote sensing. We welcome a broad spectrum of contributions to this Special Issue:

- Frozen ground, glacial geomorphology, glaciers, ice caps/sheets, lake/river/sea ice, and snow cover;
- Changes in the cryosphere - deglaciation;
- Cryospheric hazards and risks;
- Terrestrial/ space measurements;
- Any other topic concerned with the cryosphere.

This Special Issue aims to represent the frontier in remote sensing research on the cryosphere. Cryospheric science is an interdisciplinary earth science, and we welcome authors from disciplines such as geology, hydrology, meteorology, and climatology, as well as from other disciplines such as biology, engineering, and environmental science.

## Editor-in-Chief

### Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.  
Geological Survey (USGS), USGS  
Western Geographic Science  
Center (WGSC), 2255, N. Gemini  
Dr., Flagstaff, AZ 86001, USA

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
