

Remote Sensing for 2D/3D Mapping

Guest Editors:

Dr. Fangning He

Dr. Hongzhou Yang

Dr. Shengjun Tang

Dr. Ding Ma

Prof. Dr. Ayman F. Habib

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

This Special Issue welcomes contributions centered on data acquisition, processing, analysis, and interpretation within the domain of 2D/3D mapping via remote sensing. We invite both original research articles and comprehensive reviews, covering areas such as, but not limited to:

- Advances in mapping methodologies and algorithmic techniques, like LiDAR scanning, photogrammetry reconstruction, point cloud processing, and Neural Radiance Field;
- Examination of remote sensing data sourced from different sensors, such as satellite and airborne imagery, as well as LiDAR and Radar point clouds;
- Exploration of emerging mapping platforms, like UAVs and mobile mapping systems;
- Incorporation of machine learning and deep learning methodologies into remote sensing mapping;
- Application of remote sensing-driven mapping in applications such as digital twins, transportation planning, environmental modeling, precision farming, etc.;
- Application of night-time lights for mapping urban structure and dynamics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (General Earth and Planetary Sciences)
