

## Earth Observation Using Satellite Global Images of Remote Sensing

Guest Editors:

**Dr. Giuliana Bilotta**

DICEAM Department, University  
"Mediterranea" of Reggio  
Calabria, 89122 Reggio Calabria,  
Italy

**Prof. Dr. Jon Atli Benediktsson**

Faculty of Electrical and  
Computer Engineering, University  
of Iceland, IS 102 Reykjavík,  
Iceland

Deadline for manuscript  
submissions:

**15 June 2024**

### Message from the Guest Editors

Dear Colleagues,

The recent growing availability of satellite remote sensing imagery is becoming increasingly important as more and more satellite imagery is made available from various sensors, even for free, and new groups of satellites are put into orbit to allow global analyses. The same applications are continuously expanding: today they enable land cover and land use mapping (specifically, detection of urbanization, also at global level, monitoring of cultivated land in order to detect water stress and desertification, and in order to direct crop operations); they also are employed for detecting and monitoring air, land and sea pollution, and for fighting forest wildfires.

We are pleased to invite you to contribute to this Special Issue in subjects related to the journal scope. This Special Issue aims to explore the recent progresses of in the field of satellite Remote Sensing and possible further developments.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
