Message from the Guest Editors

Life Cycle Assessment (LCA) often attributes the potential environmental impacts into three so-called Areas of Protection (AoP), i.e., natural environment, human health and resources. The role of the latter in LCA is still debated and there is no consensus on how this AoP should be tackled methodologically. With that in mind, we kindly invite experts in the field to submit scientific articles discussing this topic, for instance (but not limited to):

- What resources should it include?
- What is the connection with ecosystem services?
- How can natural and human-made resources be differentiated?
- What are the potential overlaps with other AoPs?
- How should circularity and/or criticality fit in this AoP (even in LCSA)?

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*Nature and Landscape Conservation*)
