Message from the Guest Editor

Dear Colleagues,

Solutions to problems from quantitative risk management have recently become increasingly more computational in nature, more complex to design, more challenging to implement, more difficult to test and run, more demanding to deploy and maintain, and harder to integrate in software relevant for business practice. These are all aspects the research area computational risk management is concerned with. This Special Issue of *Risks* is dedicated to this new research area in the form of short articles highlighting some of its aspects.

Message from the Editor-in-Chief

Risks is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Economics, Econometrics and Finance (miscellaneous)*)
