Message from the Guest Editor

Correctly assessing credit risk still represents an important challenge for both practitioners and scholars. On the one hand, credit risk measures play a central role in the banking sector's regulations, governing the profitability of financial institutions which remain at the heart of our economic system. On the other hand, effectively computing such measures in a sound and rigorous way triggers important challenges because of the lack of relevant information and/or models. In practice, computing a 99.9% VaR in a statistically meaningful way is not so easy, and typically requires a lot of assumptions that may significantly impact the figures. It is therefore important that academics pursue efforts to improve this.

This Special Issue aims at collating papers contributing methodologically and/or computationally, towards a more rigorous and reliable management of credit risk of financial institutions. Theoretical and empirical research works covering theoretical properties and/or computational aspects of risk measures are welcome.

Message from the Editor-in-Chief

Risks is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Economics, Econometrics and Finance (miscellaneous)*)
