

sensors

Dear Colleagues,

As Editor-in-Chief of *Sensors*, I am pleased to announce the four winners of the 2020 Travel Awards sponsored by *Sensors*. The awards were granted to **Dr. Amir Hatami**, Postdoctoral fellow at the University of Gothenburg; **Dr. Carlo Massaroni**, Postdoctoral fellow at the Università Campus Bio-Medico di Roma; **Dr. Paolo Bollella**, Postdoctoral fellow at Clarkson University; and **Dr. Wei Lin**, Postdoctoral fellow at the University of Technology Sydney. The awards consist of 800 Swiss Francs each to support attendance at the academic conference related to sensors and sensing topics in 2020.

2020 TRAVEL AWARD WINNERS

Dr. Amir Hatami focus on nano-microscale electrodes and single cell analysis.

Dr. Carlo Massaroni's main research interests are fiber-optic-based sensors for biomedical applications area and measurement systems for respiratory diagnosis, control, and monitoring.

Dr. Paolo Bollella's research topics include signal-switchable bioelectronics and enzymatic Boolean logic gates.

Dr. Wei Lin's research focus includes rectennas for far-field wireless power transfer (WPT); electrically small, CP, satellite; reconfigurable, and HF antennas.

I would like to congratulate the winners and thank the selection committee for their excellent work in the hard task of selecting the winners from such a large number of excellent candidate profiles.

Prof. Vittorio M.N. Passaro
