Application of Transfer Learning and Ensembling Techniques for Cyber Security, Medicine, and Education Using Sensing Data

Guest Editors:

Dr. Kamran Shaukat

School of Information and
Physical Sciences, The University
of Newcastle, Callaghan, NSW
2308, Australia

Dr. Suhuai Luo

School of Design Communication
and IT, The University of
Newcastle, Newcastle, Australia

Deadline for manuscript
submissions:

10 December 2024

Message from the Guest Editors

Over the past decade, the rise of machine learning (ML) and deep learning (DL) evolved in various areas of life, especially in medicine, cyber security, finance, and education. In machine learning, the development of ensemble methods has gained significant attention from the scientific community. Machine learning ensemble methods combine multiple learning algorithms to obtain a better predictive performance than could be obtained from any of the constituent learning algorithms alone.

On the other hand, deep learning methods have actively been extended to other parts of machine learning, including reinforcement learning and transfer/meta-learning. At the same time, standard deep learning methods, such as convolutional neural networks (CNNs), have also been extensively studied and applied to diverse industrial fields. The training of these networks depends upon the data. The sensing data could be collected through sensors, images, actuators, virtual learning environments (for education), and IoT devices.

Special Issue

sensors

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
