Sensors and Algorithms for 3D Visual Analysis and SLAM

Guest Editor:

Dr. Andrew R. Willis

Department of Electrical and Computer Engineering, University of North Carolina-Charlotte, Charlotte, NC 28223-0001, USA

Deadline for manuscript submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

The successful development of critical future technologies hinge on the analysis algorithms that take as input unorganized collections of sensed visual data, quickly and reliably process these measurements, and extract models that organize, integrate, and semantically explain the sensor data. This Special Issue invites submissions that describe novel academic research that investigates 3D sensing technologies and algorithms that extract 3D visual, geometric, or semantic information.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1
