Message from the Guest Editors

Dear Colleagues,

In recent years, intelligent artifacts such as robots, UAVs and autonomous cars have witnessed rapid development. The intelligent artifacts rely highly on PNT information. While GNSS based satellite positioning still dominates, many novel technologies such as integrated satellite positioning and precise point positioning in low earth orbit satellite communication megaconstellations are on the horizon toward improved assurance and precision. This Special Issue is addressed to recent progress in satellite positioning, multi-sensor fusion, location based services and other location sensors.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
