Message from the Guest Editor

Blockchain technology has received great attention in different areas due to its unique properties such as anonymity, verifiability, immutability, and decentralization. However, due to the publicity of communication environments, such as the Internet, WiFi, LAN, or other types of networks, security and privacy concerns with Blockchain and IoT systems have become hot topics of discussion. This Special Issue is focused on new security solutions for scenarios or applications where blockchain and the Internet of Things are deployed in various areas.

Submissions are welcome on but not limited to the following topics:

- Blockchain and IoT solutions on existing systems;
- Blockchain security and privacy;
- Blockchain issues and trends;
- Blockchain authentication and authorization;
- Blockchain-based security for IoT;
- Cryptographic protocols for Blockchain and IoT;
- Data and system integrity in Blockchain and IoT;
- IoT-based solutions on the Blockchain system;
- IoT authentication and authorization;
- Security and privacy in IoT;
- Service and system design in IoT; and
- Trust management and untraceability in Blockchain and IoT.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
