Human and Observing, Chapman
University, CA, USA

Dr. Katsumi Hattori

Graduate School of Science,
Chiba University, 1-33, Yayoi,
Inage, Chiba 263-8522, Japan

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

Dear Colleagues,

A significant challenge for the science community is understanding earthquake processes and other geohazards in the context of rapidly changes to the Earth as a result of the Sun's activities and exacerbating climate change. This volume presents the latest results of cross-disciplinary space- and ground-based studies on the synergy of pre-earthquake processes. It advances earlier interdisciplinary results from studies of the Earth's global environment with ground- and/or space-borne multi-instrument observations. Over the last 30 years, international community cooperation has shown the existence of pre-earthquake phenomena and suggested the concept of lithosphere–atmosphere–ionosphere coupling (LAIC), which indicates that different types of disturbances in the lithosphere—electromagnetic, electrical, mechanical, and geochemical—accompany the earthquake preparation process. However, there are still a few open questions regarding differences in space weather and other influences, bio-sensing phenomena, and the role of triggers in the occurrence of earthquakes.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
