Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to contribute to the state-of-the-art and present current applications of deformation monitoring sensors and deformation modelling. It will contain papers on all aspects of deformation monitoring in geodesy and geomatics. The papers will represent an extension of the articles presented at the [4th Joint International Symposium on Deformation Monitoring \(JISDM2019\)](#), which was held in Athens, Greece in May 2019. Invited topics include but are not limited to methods and new concepts; integration and automation; as well as innovative applications in the broader field of deformation monitoring, analysis, and interpretation.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (Instrumentation)
