### Message from the Guest Editor

The forthcoming Special Issue in the *Sensors* journal is poised to explore the confluence between emotion recognition and biometric authentication by leveraging novel, contactless sensing technologies. Emotions, pivotal in shaping human interactions and responses, when accurately deciphered, offer boundless opportunities spanning mental health surveillance, enhanced human-machine rapport, and tailored services. Research topics that align with each purpose of emotion recognition and biometric authentication, without combining the two, can also be submitted to this Special Issue.
