### Message from the Guest Editor

Dear Colleagues,

This Special Issue will provide the opportunity to examine the recent developments and the state of the field of luminescence nanothermometry, as well as address the challenges that persist in their synthesis and characterization, sensing capabilities, their integration in biological systems, as well as the translation towards development of real-life applications.

I invite you to contribute your original research papers, as well as comprehensive reviews, aligned with these themes, to advance and improve the actual state-of-the-art in luminescence nanothermometry, providing new opportunities, approaches, and solutions.
