Message from the Guest Editors

Dear Colleagues,

In the last decade, photonics has emerged as a major interdisciplinary field of science and technology with a focus on the transport and manipulation of light.

Novel design criteria and experimental methodologies to control the functionality of microgels are continuously encouraging the further development of highly interesting concepts in the area of photonic system technology and science. Within this context, this Special Issue aims to gather a prestigious collection of key studies devoted to the technology of ‘Microgel Photonics’.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
