## Nanostructured Materials Systems for Optical Sensing

Guest Editor:

**Dr. Sara Fateixa**

Centro de Investigação em  
Materiais Cerâmicos e  
Compósitos, 3810-193 Aveiro,  
Portugal

Deadline for manuscript  
submissions:

**31 December 2023**

### Message from the Guest Editor

Nanotechnology has demonstrated great potential in the preparation of new nanostructured materials with different properties, new functions, and added value. Numerous studies have been carried out with the aim to improve the properties and performance of optical functional materials through the application of nanocomposites, metallic nanoparticles or carbon materials.

Over the last decade, optical-sensing-based nanostructured materials have arisen as a key research topic in both fundamental and applied sciences. It is known that the optical response of nanostructured materials depends on their environment, namely, pressure, temperature, pH, and humidity, resulting in sensor materials with increased sensitivities, multiplexing capabilities, and high efficiency in detecting and monitoring chemical or biological molecules.

This Special Issue is addressed at all types of nanostructured materials that can be applied in optical sensing and detection of biomolecules, aiming to collect the latest trends and progress in the field of “Nanostructured Materials for Optical Sensing”.

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** :— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
