Deadline for manuscript  
submissions:

**31 May 2024**

### Message from the Guest Editors

Dear Colleagues,

Structural health monitoring (SHM) is the most interesting topic within non-destructive evaluation (NDE), as well as the most challenging technique to be implemented across several fields, especially in aeronautics and aerospace, as well as in wind turbines. In these particular fields, the challenges involve all the possible techniques and technologies which participate in the SHM process: signal generation and acquisition systems, wired and wireless connections, embedded sensors, data cleansing and processing techniques, interpretation of the extracted information, damage localization algorithms, and damage characterization and quantification methods. This Special Issue is intended to present all the aforementioned techniques and technologies, concerning the current state-of-the-art of the field, as well as to introduce emerging methodologies that can achieve SHM to be fully implemented in the industrial context and, particularly, in proper applications of the aeronautical and aerospace world, such as commercial or transport aviation, or wind turbines, in which SHM has not been completely applied yet.

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access :** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
