Cancer mortality rates have dropped considerably in the last three decades, largely because of the early detection of cancers. More indicators for the early stage of cancers are needed in order to continue to improve the accuracy, to lower the detection limit, and to expand the early detection of more types of cancers, so the cancers can be treated at their earliest stages.

I would like to invite you to submit either original articles or review papers on sensors and methods for cancer biomarkers detection. The Special Issue particularly welcomes but is not limited to topics listed in the following keywords.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
