Multi-Agent-Based Human-Computer Interaction (Volume II)

Guest Editor:

Prof. Dr. Antonio Fernández-Caballero

Instituto de Investigación en Informática de Albacete, Universidad de Castilla-La Mancha, 02071 Albacete, Spain

Deadline for manuscript submissions: closed (20 July 2023)

Message from the Guest Editor

Human–computer interaction (HCI) is concerned with the joint performance of tasks by humans and machines. Multi-agent systems (MAS) can be regarded as an assemblage of self-contained problem-solving systems capable of autonomous reactive, pro-active, and social behavior. It applies several complex methods to adapt to new behaviors needed to achieve the intended objectives.

This Special Issue (SI) on "Multi-Agent-Based Human-Computer Interaction" will integrate MAS and HCI where the science and technology of sensors are at the core of the proposal. The papers submitted to this SI must highlight multi-agent-based technologies and solutions centered around the use of intelligent sensors and sensor networks in current and emerging applications in human-computer interaction.

Topics of interest include (but not limited to) the use of sensors for the following:

- Coordination and control in multi-agent-based human-computer interaction;
- Learning and adaptation in multi-agent-based human-computer interaction;
- Multi-agent-based virtual and augmented human-computer interaction;
- Multi-agent-based human-robot interaction.

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
