Pollution Research, 87036 Rende,  
Italy

**Prof. Dr. Milena Horvat**

Department of Environmental  
Sciences, Jožef Stefan Institute,  
Jamova 39, SI-1000 Ljubljana,  
Slovenia

Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### Message from the Guest Editors

Dear Colleagues,

Mercury is a persistent and toxic pollutant of global concern, capable of cycling within and between different environmental compartments, thus representing a risk for human health and ecosystems. Due to the low concentrations of mercury in different matrixes, the sampling methods have to be sensitive enough to cope with the requirements of traceability, accuracy, reproducibility and robustness.

This Special Issue of *Sensors* aims to publish state-of-the-art scientific results related to advances in monitoring, analytical methods and technologies designed to quantify and characterize mercury contaminations at hot spots, urban and industrial sites as well as at background location, within the following topics

optical colorimetric, electrochemical, chemical and bio-sensors; stand-alone sensor systems or part of an array of sensors; passive sampling devices; new nanomaterials to monitor mercury species; innovative analytical techniques to characterize mercury compounds in abiotic and biotic samples; tools for big field sensor data analytics.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
