Vehicle-to-Everything (V2X) Communications

Guest Editor:

Dr. Khalil El-Khatib

Faculty of Business and
Information Technology, Ontario
Tech University, Oshawa, Canada

Deadline for manuscript
submissions:

closed (30 December 2021)

Message from the Guest Editor

Over the last few years, there have been a large number of advancements in communication and computation technologies, and many of these technologies are being embedded in the vehicles of the future. These vehicles, dubbed “networks-on-wheels”, are able to communicate with various elements of intelligent transportation systems, including pedestrians, vehicles, and infrastructure, and hence led to the term vehicle-to-everything (V2X). Whether based on cellular networks or dedicated short-range communications (DSRC), V2X is the main enabler for advanced driver assistance systems (ADAS), and has the potential to make the transportation system safer, more efficient, and more environmentally friendly.

This Special Issue of the *Sensors* magazine looks at recent research and developments in the area of V2X, as well the remaining challenges and road blocks.

- Intelligent vehicles
- Intelligent transportation systems
- 5G mobile communication
- Vehicle-to-vehicle communication
- V2X communications
- Vehicle safety
- Vehicular ad hoc networks
- Mobility management

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
