Message from the Guest Editor

Dear Colleagues,

The emerging and spreading of a new Coronavirus provoked a global sanitary emergency. COVID-19 is a respiratory virus transmitted by saliva droplets. This implied the use of isolation and the first strategy to contain the infection. Health disciplines and hospital activities were temporarily stopped to limit the movement of people and prevent outbreaks in hospitals.

ENT and maxillofacial specialists are operators with a high risk of exposure, and therefore the after-covid19 period will represent an important change in the protocol of personal protections.

This Special Issue welcomes articles, letters, communications, and reviews on the implications of COVID-19 in these disciplines, as well as research on the virus colonization of the sinus mucosa.

Message from the Editor-in-Chief

Sinusitis is an international, peer-reviewed, open access journal, which supports the whole field of sinusitis and its related areas, with the aim to bridge the gap between medical research and clinical practice about sinusitis. The journal is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance, thus allowing the scientific community and the public to have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 34 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in the second half of 2023).

Recognition of Reviewers: APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
