### Message from the Guest Editor

Dear Colleagues,

Over the last two decades, a lot of research and policy dialogues have been published on climate change-induced migration or environmental migration. However, the rationale of staying put (non-migration) is grossly absent, both in development initiatives and literature. Some literature certainly strived to capture reasons for not moving from the place of origin despite being exposed to environmental onsets. Following the above discussion, there is a need to explore migration decisions (either migrate or stay put) and debates from vulnerable regions all over the world. I would like to invite you to fill in this gap in environmental migration and adaptation studies by contributing to Social Sciences.

This SI is aimed at knowing why and how the migration decisions (to migrate/stay put) of people at risk (those who are vulnerable to climate risks) are made, what kind of role the social, economic, cultural, political, and environmental conditions of the respective societies and locales play in migration decisions, and how these discourses be can theoretically and conceptually grounded.

## Message from the Editor-in-Chief

*Social Sciences* is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

**Journal Rank:** CiteScore - Q1 (*General/Social Sciences*)
