Dr. Isaac Maroto-González

Department of Audiovisual
Communication, Faculty of
Science of Communication,
University of Santiago de
Compostela, Santiago de
Compostela, Spain

Deadline for manuscript
submissions:

20 May 2024

Message from the Guest Editors

The massive spread of false information through social networks like TikTok, Instagram, and Twitter among others develop new formats where disinformation takes place. When people do not have access to proper and reliable information, the principles of democracy become endangered. This concern is most notably transferred to the communication and press offices, institutions, regional and local media, and entities. Furthermore, the production of content in an environment of disinformation is becoming more and more sophisticated due to technological advances. The level of media literacy needed to manage not only the tools but also the results of these fact-checking tools and platforms is increasing day after day. Public service media (PSM) are called upon to lead and monitor the right to truthful information, not only because it is a public service but also due to the importance that truth has as a public value, as well as the training of journalists and society in fact-checking. Disinformation in the public media and the Internet society is a complex issue that requires a multi-faceted approach to address.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*General/Social Sciences*)
